\*Does not include any impact on political subdivisions. See narrative for political subdivision estimates.

LB 297 strikes language from statute which limits the amount appropriated for the specialized telecommunications equipment program to no more than the revenue generated by one cent of the telephone access surcharge per month.

Since the language is stricken, the amount appropriated may exceed the revenue generated by one cent of the surcharge. This is permissive in nature and does not carry a cost. In addition, the provisions of LB 297 do not change the surcharge itself; the bill's provisions are limited to the nature of appropriations made based on surcharge revenue.

No fiscal impact.
