Any Fiscal Notes received from state agencies and political subdivisions are attached following the Legislative Fiscal Analyst Estimate.

This bill would change provisions relating to placement of Department of Correctional Services (DCS) inmates in county jails.

The bill applies the following limitations on placing DCS inmates in county jails:

- No more than 150 in a year statewide;
- Only those within one year of parole or release eligibility or those requiring only community-based or minimum-security supervision;
- Only if the county jail facility has the capacity and agrees to offer services to meet the offender's prerelease programming requirements when such programming is needed to become eligible for parole or release;
- DCS may place an offender who does not require programming in a county jail facility without programming; and,
- DCS may not withhold good time or sanction an offender because of his or her refusal to participate in placement in a county jail.

DCS estimates that this bill will result in 23 inmates per day staying in its facilities rather than county jails, and this could cost an estimated \$136,758 more per year.

DCS currently contracts with willing counties to use their jails to house DCS inmates. Additionally, DCS incurs per diem costs for each inmate in their facilities: \$8,226 per year in FY18.

Therefore, it appears that the impact of this bill is probably indeterminate because it would depend on the cost differential between the DCS inmate per diem and the amount paid to county jails to house DCS inmates, including the costs of transporting DCS inmates to and from county jails.

It is also noted that as of July-September 2018, the prison population was 156% of design capacity. If DCS inmates housed in county jails are included in the prison population numbers, then the prison population would be 158% of design capacity.

The Lancaster County Department of Corrections estimates no fiscal impact from this bill.
