LB 823 requires the Nebraska Information Technology Commission (NITC) to review all information technology projects regardless of fund source. The NITC may adopt policies that establish the format and minimum requirements for project submissions and monitor the progress of such projects. Currently, the NITC review process encompasses projects which directly utilize state-appropriated funds.

While the bill's provisions may have some fiscal impact, that amount was not estimated by the Department of Administrative Services. It is therefore assumed that any additional work associated with increased project reviews can be absorbed within currently budgeted funds.
