Any Fiscal Notes received from state agencies and political subdivisions are attached following the Legislative Fiscal Analyst Estimate.

LB 1172 amends statute related to electric utilities to require annual certification to the Power Review Board whether the utilities are in compliance with a requirement to maintain seventy-five percent of their generation portfolio as dispatchable resources. If a utility is out of compliance, the utility must submit a plan with the board addressing how the utility will become compliant.

The board can complete the additional duties with current resources.

No fiscal impact.

Explanation of Estimate:

No Fiscal Impact. The bill would require electric utilities to annually certify to the Power Review Board (PRB) whether they are in compliance with a requirement to maintain seventy-five percent of their generation portfolio as dispatchable resources. If a utility is out of compliance the utility must submit a plan with the PRB addressing how the utility will become compliant. The PRB does not believe the annual certifications and review of any plans to become compliant would create sufficient additional duties to cause a fiscal impact on the PRB.
