*Does not include any impact on political subdivisions. See narrative for political subdivision estimates.

LB 579 changes provisions related to customer generated electricity.

Section 4 (2) requires a customer-generator to request an inspection from the State Electrical Division.

The State Electrical Division identifies that the provisions of LB 579 will result in increased work for inspectors. The increased cost of performing these inspection will be paid for with dollars received from inspection fees. The Division points out that the needed increase in cash fund authority cannot be determined without first knowing the approximate number, location, and size of potential customer generators. If the fiscal impact of the bill's provisions is significant, it is anticipated that the Division will request a deficit appropriation and appropriate level of base budget adjustment at a later date.
