# INTRODUCTION

This first edition of *Counties At-a-Glance* ranks Nebraska counties in a variety of metrics – from economics to education to taxes. It is a statistical snapshot of Nebraska, designed to give policymakers and the public a glimpse of the challenges and opportunities facing the state.

The tables, graphs, and maps in this report use the most current data available for all 93 counties. Often, per capita or percentage figures

are used to account for population differences between counties. Counties are always ranked from highest to lowest value, without regard to subject matter, so a higher ranking is not always preferable to a lower ranking. Counties may occasionally appear to have the same values, but different rankings. This is because values are displayed only to one or two decimal places. Thus, two counties may appear to be tied, when in reality, their actual values differ slightly.

Every ranking also includes a choropleth map, and a bar graph comparing the highest and lowest ranked counties. Source information is located at the bottom of each page, including a link to the raw data. Text in each header includes supplemental information about the subject, including definitions, additional rankings, and more detailed data. Unless otherwise noted, rates are determined using the population of adults 18 years of age and older.

# MINORITY POPULATION

Race data in the census is based on self-identification. Respondents choose the race (or races) with which they most closely identify, and indicate whether they are of Hispanic or Latino origin. This ranking is based on the inverse of total respondents who self-identify as "Non-Hispanic Whites."

## PERCENT OF POPULATION THAT IDENTIFY AS "NON-WHITE"

## PERCENT OF POPULATION THAT IDENTIFY AS "NON-WHITE"

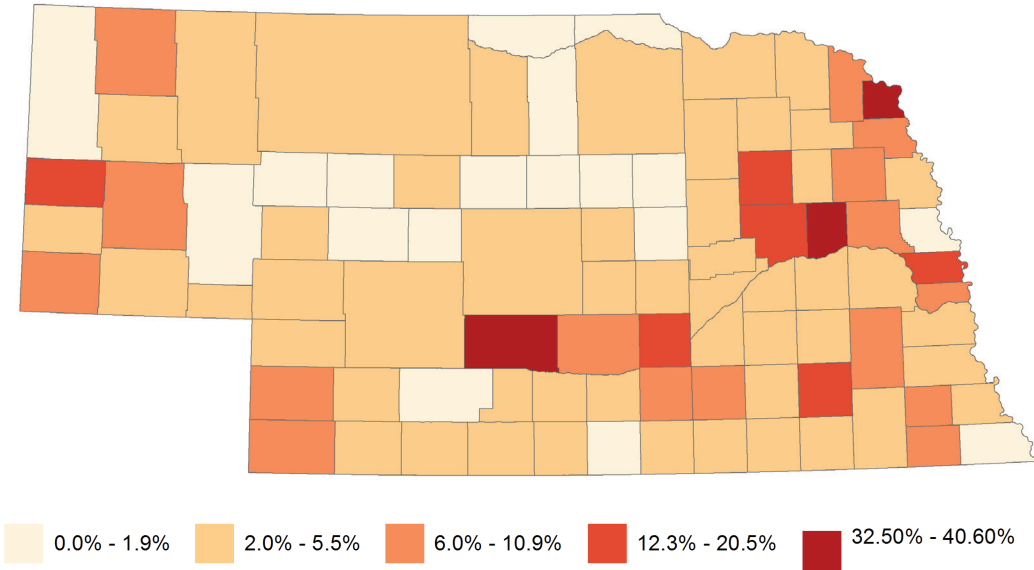

## Percent of Population that Identify as "Non-White"

# OBESITY

Obesity is defined as people with a Body Mass Index (BMI) of 30.0 or more, regardless of sex. BMI is a ratio of height to weight, calculated by dividing weight in pounds (lbs) by height in inches (in), squared, and multiplying by a conversion factor of 703. As an example, a person 5' 8" and weighing 197 pounds has a BMI of 30.

# HOUSEHOLD INCOME

Median household income is the midpoint of all incomes in a county -- half of households made more than the median, and half made less. This ranking is based on the five-year estimate of inflation-adjusted income for the years 2009 through 2013.

# HOME OWNERSHIP

A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room intended for occupancy. A housing unit is owner-occupied if the owner lives in the unit, even if it is mortgaged or not fully paid for. This ranking is based on a five-year average of homeownership from 2009-2013.

## PERCENT OF HOMES OCCUPIED BY THE OWNER

# ARREST RATE

For this ranking, an arrest is counted each time a person is taken into custody or issued a citation or summons. While an individual may be charged with multiple crimes at the time of arrest, only one arrest is counted. An arrest is counted for the most serious charge at the time of the arrest.

# VETERANS

Veterans are defined as men and women who have served (even for a short time), but are not currently serving, on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or the Coast Guard, or who served in the U.S. Merchant Marine during World War II.

## VETERAN POPULATION PER 1,000 RESIDENTS

## VETERAN POPULATION PER 1,000 RESIDENTS

## Veteran Population per 1,000 Residents

# SALES TAX

The average sales tax rate varies widely across Nebraska. Even within a single county, sales tax rates may differ due to local-option sales taxes. Because of these variables, this ranking is based on per capita sales taxes collected, instead of tax rates.

## PER CAPITA SALES TAX COLLECTED

## PER CAPITA SALES TAX COLLECTED

## Per Capita Sales Tax Collected
