COUNTIES AT-A-GLANCE

INTRODUCTION

The 2023 edition of Counties At-A-Glance features sections of comprehensive county information and comparative data designed for a legislative audience. This report includes separate profiles for each of Nebraska's 93 counties containing data related to population, health, income and poverty, justice, housing, employment, and taxes. Also presented in this report are 35 county ranking pages highlighting data comparisons across a variety of topics. Counties At-A-Glance offers consistent county-level data from multiple sources in order to support analysis of all counties in Nebraska.

Near the end of this report are reference lists encompassing each county's legislative districts; cities, villages, and county seats; public school districts and private schools; and forms of government. Finally, provided at the end of this report are Glossary and Sources sections consisting of descriptions about the data provided and links to the material contained in this report.

The Legislative Research Office presents Counties At-A-Glance as a quick reference or starting point for policy-making, and to provide both newly-elected and returning senators with essential county statistics in a user-friendly format. Our goal is to continually improve each iteration of the At-A-Glance reports, and we welcome the opportunity to hear from you about how Counties At-A-Glance can become even more useful for the purpose of policy debate and lawmaking.

Private health insurance is a plan provided through an employer or union, a plan purchased by an individual from a private company, or TRICARE or other military health care.</p> <p>Health insurance coverage in the ACS and other Census Bureau surveys define coverage to include plans and programs that provide comprehensive health coverage. Plans that provide insurance only for specific conditions or situations such as cancer and long-term care policies are not considered comprehensive health coverage. Likewise, other types of insurance like dental, vision, life, and disability insurance are not considered comprehensive health insurance coverage.</p> <p>The U.S. Department of Health and Human Services, as well as other federal agencies, use data on health insurance coverage to more accurately distribute resources and better understand state and local health insurance needs.</p>	American Community Survey (2021 5-Year Estimates)	U.S. Census Bureau	https://data.census.gov/cedsci/

Justice	Crime Rate (per 1,000 residents)	N/A	<p>Offense data are based upon crimes reported or known to law enforcement. In UCR, offense data are collected on eight crimes: Homicide, Rape, Robbery, Assault, Burglary, Larceny, Motor Vehicle Theft, and Arson. Crime rate is a count of crimes compiled to assess the effectiveness of a crime control policy, and the impact of the policy on the risk of crime victimization. Crimes/total population is a “gross” rate; it includes both children and adults. Children are much less likely than adults to be crime victims.</p> <p>While law enforcement agencies are required to submit monthly reports, not every agency does. Therefore, the data presented may be underreported for some jurisdictions.</p> <p>Attempts at comparison of crime figures between jurisdictions should not be made without first considering the individual factors present in each community. Consider factors such as the demographics of the population (racial and ethnic makeup, age and gender, educational levels, prevalent family structures); the industrial/economic base of the jurisdiction; the dependence upon neighboring jurisdictions; dependence upon nonresidents (tourists, conventions, sports activities, etc.); the strength and aggressiveness of a jurisdiction’s law enforcement agency; policies of other components of the criminal justice system (prosecutorial, judicial, correctional, and probational); and the attitudes of the citizens toward crime and their crime reporting practices, especially concerning minor offenses.</p>	Nebraska Crime Commission (2020)	Arrest and Offense Data	https://ncc.nebraska.gov/data-and-reports
Justice	Arrest Rate (per 1,000 residents)	N/A	<p>An arrest is counted each time a person is taken into custody or issued a citation or summons. While an individual may be charged with multiple crimes at the time of arrest, only one arrest is counted. An arrest is counted for the most serious charge at the time of the arrest.</p> <p>The arrest rate for the United States in 2016 was 3,298.5 arrests per 100,000 inhabitants. The arrest rate for violent crime (including murder and non-negligent manslaughter, rape, robbery, and aggravated assault) was 159.7 per 100,000 inhabitants, and the arrest rate for property crime (burglary, larceny-theft, motor vehicle theft, and arson) was 420.6 per 100,000 inhabitants.</p>	Nebraska Crime Commission (2020)	Arrest and Offense Data	https://ncc.nebraska.gov/data-and-reports

Housing	Total Housing Units	N/A	<p>A housing unit is a living quarters in which the occupant or occupants live separately from any other individuals in the building and have direct access to their living quarters from outside the building or through a common hall. Housing units are usually houses, apartments, mobile homes, groups of rooms, or single rooms that are occupied as separate living quarters. They are residences for single individuals, for groups of individuals, or for families who live together. A single individual or a group living in a housing unit is defined to be a household. Additional details about housing for the elderly population and group homes are provided in the section “Housing for the Older Population.”</p> <p>For vacant housing units, the criteria of separateness and direct access are applied to the intended occupants whenever possible. Nontraditional living quarters, such as boats, RVs, and tents, are considered housing units ONLY if someone is living in them and they are either the occupant’s usual residence or the occupant has no usual residence elsewhere. These nontraditional living arrangements are not considered housing units if they are vacant.</p>	Decennial Census (2020)	U.S. Census Bureau	https://data.census.gov/cedsci/
Housing	Vacant Housing Units	N/A	<p>A housing unit is classified as vacant if no one is living in it on Census Day, unless its occupant or occupants are only temporarily absent—such as away on vacation, in the hospital for a short stay, or on a business trip—and will be returning. Housing units temporarily occupied at the time of enumeration entirely by individuals who have a usual residence elsewhere are classified as vacant. When housing units are vacant, the criteria of separateness and direct access are applied to the intended occupants whenever possible. If that information cannot be obtained, the criteria are applied to the previous occupants. Boats, RVs, tents, caves, and similar shelter that no one is using as a usual residence are not considered living quarters and, therefore, are not enumerated at all.</p>	Decennial Census (2020)	U.S. Census Bureau	https://data.census.gov/cedsci/

Housing	Median Monthly Owner or Renter Costs	Median Monthly Housing Costs	<p>Housing Costs are the sum of payments for mortgages, deeds of trust, contracts to purchase, or similar debts on the property (including payments for the first mortgage, second mortgages, home equity loans, and other junior mortgages); real estate taxes; fire, hazard, and flood insurance on the property; utilities (electricity, gas, and water and sewer); and fuels (oil, coal, kerosene, wood, etc.). It also includes, where appropriate, the monthly condominium fee for condominiums and mobile home costs (personal property taxes, site rent, registration fees, and license fees). The data for monthly housing costs are developed from a distribution of "Selected Monthly Owner Costs" for owner-occupied units and "Gross Rent" for renter-occupied units.</p> <p>When the data is used in conjunction with income data, the information offers an excellent measure of housing affordability and excessive shelter costs. Employment	Self-Employed	N/A	Includes people who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm. This class is often tabulated together with unpaid family workers. Examples of self-employed: Owner of non-incorporated business, professional practice, or farm; Owner of incorporated business, professional practice, or farm; Worked without pay in a for-profit family business or farm for 15 hours or more per week. Self-employed people whose business was incorporated are included with private wage and salary workers because they are paid employees of their own companies. Taxes - Income	Earned Income Credit	N/A	Beginning with tax year 2007, Nebraska taxpayers receive a refundable earned income tax credit equal to 10% of any federal earned income tax credit received. The federal earned income tax credit is a refundable credit available to low-income, working taxpayers. The credit is calculated as a percentage of the earned income of the individual, up to a phase-out amount. Once the individual reaches the lower reaches of the middle class the credit is phased out. For 2006, \$412 was the maximum credit for an individual with no children, \$2,747 for an individual with one child, and \$4,536 for an individual with two or more. The credit began phasing out once earned income exceeded \$6,740 for an individual with no children and \$14,810 for individuals with one or more children. LB968 (2006) and LB367 (2007) enacted, and then expanded, an earned income tax credit and both bills widened brackets slightly to reduce income taxes.
